

REMARKS

Favorable reconsideration of this application is respectfully requested.

Claims 24-27 are pending in this application. Claims 26 and 27 are added by the present response. Claim 25 was objected to for an informality. Claim 25 was rejected under 35 U.S.C. § 112, second paragraph. Claim 24 is allowed.

Initially, applicants gratefully acknowledge the early indication of the allowance of claim 24.

Addressing now the objection to claim 25, claim 25 is amended as suggested in the Office Action to address the objection thereto.

Addressing now the rejection of claim 25 under 35 U.S.C. § 112, second paragraph, that rejection is traversed by the present response. Claim 25 is also further amended to now recite “a plurality of shift registers formed on said insulation substrate which convert a digital signals into a plurality of first serial signals and output said first serial signals”, along the lines suggested in the Office Action. That amendment is believed to address the rejection of claim 25 under 35 U.S.C. § 112, second paragraph.

Claim 25 is also amended by the present response to make clarifications in the language therein, which changes are not believed to raise any issues of new matter.

In view of the present response applicants respectfully submit claim 25 is also allowable.

The present response also adds new claims 26 and 27 for examination, which are not believed to raise any issues of new matter and that are also believed to recite allowable subject matter.

As no other issues are pending in this application, it is respectfully submitted that the present application is now in condition for allowance, and it is hereby respectfully requested that this case be passed to issue.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,  
MAIER & NEUSTADT, P.C.
